North Ridge Pumps are an independent manufacturer and distributor of pumps. We are part of the DMS Group who have operated within the building services, district heating, process and renewable industries for over 20 years, with a proven track record for product support and customer service throughout the whole of the UK and internationally. Being centrally located in Nottingham, it allows us to service the entire UK.

It was a natural progression to diversify into the pumping industry having regularly received enquiries for pumps, with associated flowmeters. North Ridge Pumps have been established since 1998 and have a wealth of experience in pumping applications, handling fluids from fresh water, seawater and glycols to heavy oil, grease, food and chemicals.

We work within a range of industries, both in the UK and internationally. Our pump types range from standard centrifugal pumps and multistage pumps, to immersed and process overhung solid handling pumps. We also supply a wide range of positive displacement pumps, such as; peristaltic, progressing cavity, screw, vane and gear, allowing us to provide more than one solution for your process and accommodate almost any fluid.

We understand at times associated process equipment may be required alongside your pump; therefore we have become accustomed to supplying pumps complete with control panels, inverter drives, monitoring, couplings, hose, flowmeters and valves.

The North Ridge difference
ENGINEERED BEYOND YOUR NEEDS FOR A RANGE OF MARKET SECTORS

+ Agriculture
+ Aviation
+ Beverage
+ Building Services
+ Chemical Manufacture
+ Decommissioning
+ Energy from Waste
+ Energy Storage Industry
+ Foam Products
+ Food
+ Fuels, Biofuels & Petroleum
+ Household Chemicals
+ Marine
+ Mechanical
+ Mining
+ Oil & Gas
+ Paint Print & Varnish
+ Pharmaceutical
+ Power Generation
+ Pulp & Paper
+ Railway
+ Renewable Energy
+ Rubber & Plastics
+ Surface Treatment
+ Wastewater Treatment

TECHNICAL SUPPORT
We know at times pump selection is difficult. Pump selections are made with confidence by technical sales engineers who understand your process, ensuring the equipment is engineered beyond your needs.
To select the correct technical solution for your requirement, longevity of design is prioritized. If there are existing issues you need assistance with, we work with you to solve these, such as: high maintenance costs, frequent service periods, repeated equipment breakdown leading to lost time, inconsistency in flow rates, or pumped product being inconsistent.

APPLICATION EXPERIENCE
Due to our 20 years application experience, we work with you to ensure our pumps operate according to your desired application. Our experience means we have most likely provided a solution for a similar process previously. With proven results, we know how to achieve your outcome sooner.
As our pumps are completely configurable, we design pumps with materials according to your requirement and your required duty point. Pumps are engineered specifically for your process, whether they are baseplate mounted, within a mobile frame or in kit form with couplings, hose and dispensing nozzle, it’s all tailored to your needs.

INDUSTRY KNOWLEDGE
We have a thorough understanding of a range of industries through experience in supplying the offshore oil and gas market, papermills, chemical and food manufacturers to name a few. We not only understand the importance of downtime, but also what each process requires. We understand how small design improvements specific to the nature of your industry and application can reduce downtime, facilitate maintenance and improve longevity.

We supply replacement pumps and spares for several well-known brands, ensuring a single point of contact for technical assistance, troubleshooting and supply of all your requirements. All your spare parts, one source.

We are accustomed to exporting and understand at times the destination of shipments can change or be unknown until goods are packed. We therefore pack to ISPM 15 as standard, ensuring there are no delays during transit. We provide full export documentation with orders, which include EUR 1, certificates of origin and conformity and testing certificates to 3.1 / 3.2.

We work with accredited freight forwarders to deliver goods via all modes of transit, either to ports and airports, or directly to your door. We utilise INCOTERMS, ensuring it is clear from the outset where responsibility lies with duties, taxes and handling, meaning there are no surprises.

For international projects, we work with UK Export Finance (UKEF) to offer attractive finance terms and insurance for large overseas projects, where significant capital investment is required. We meet the required UK content threshold to ensure you qualify for these competitive financing terms.

**TYPICAL APPLICATIONS**
- Atex & Hazardous Liquids
- Chemical Dosing & Transfer
- Container Emptying & Filling
- Dewatering
- Fuel & Oil Transfer
- High Temperature & Low Temperature Liquids
- High Viscosity & Solids Handling
- Hygienic & Pharmaceutical
- Liquid Gas & Entrained Gas Handling
- Marine Ballast, Bilge, Fuel & Firefighting
- Seawater & Fresh Water Cooling
- Sludge, Slurry & Effluent Transfer
